### **DETAILED ACTION**

1. It would be of great assistance to the Office if all incoming papers pertaining to a filed application carried the following items:

1. Application number (checked for accuracy, including series code and serial no.).
2. Group art unit number (copied from most recent Office communication).
3. Filing date.
4. Name of the examiner who prepared the most recent Office action.
5. Title of invention.
6. Confirmation number (See MPEP § 503).

### ***Information Disclosure Statement***

2. The references listed in the PTO-1449 filed 4/28/03 have been considered by the examiner.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1-3,5-6 are rejected under 35 U.S.C. 102(a) as being anticipated by Yoshida et al (5,886,987).

Yoshida discloses a transmission /reception system comprising: a plurality of transmitting antennas ( 107-1-107-N) for transmitting a plurality of reference signal and data signals; a

Art Unit: 2631

plurality of reference signal generator (40-1-40-N; 104-1-104-N); a data signal generator for producing a data signal (10-1-10-N; 101-1-101-N); and a plurality of mixers (103-1-103-K; 105-1-105-N) for producing the plurality of the data signal. The system further comprises at least one addition data signals generator (10-K) for producing at least one additional data signal; and a plurality of mixers for producing a plurality of versions of that at least one additional data signal.(see fig.1, col.3, line 57 to col. 4, line 52)

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshida et al..

Yoshida discloses all the subject matters of the present claimed invention as described above. Yoshida differs from the present invention in that he is silent in terms of the base station transmission being in a time division duplex format. However, such format is well known in the art of communication and would have been obvious to one of ordinary skill in the art at the time the invention was made to transmit the signal of Yoshida in TDD format.

*Response to Arguments*

7. Applicant's arguments filed 3/25/03 have been fully considered but they are not persuasive.

Applicant argues that Yoshida does not disclose transmitting a reference signal at all.

However, examiner disagree with applicant's argument. Because Yoshida does disclose transmitting a plurality of reference signal using a plurality of antenna. (See fig.1. a plurality of reference signal generator (40-1-40-N; 104-1-104-N); a plurality of transmitting antennas ( 107-1-107-N) for transmitting a plurality of reference signal and data signals).

*Conclusion*

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to T.Ghebretinsae whose telephone number is 703-305-4777. The examiner can normally be reached on Monday-Friday from 8 to 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chi Pham, can be reached on (703) 305-4378. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9314.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-4700.
